ROUND 2 | QUICK GUIDE

31 October 2026 | CC 05 | 10:00 AM-1:00 PM IST Report by **9:30 AM** with your **laptop and charger**. Late arrivals get less time.

Play

- Open 8-231-75-42.sslip.io and use your team code. Choose your own member.
- Languages: **C, C++, Java or Python**. Attempt the 100 bugs in any order.
- Fix the given buggy code. **Run samples** is practice; **Submit fix** is official.
- Normally, the **first correct server-received submission** wins the bug. Opening it does not reserve it. Each team can earn a bug only once.
- Teammates share coins, points, hints and items. Solo entrants work alone.

Coins, hints and points

Unspent Round 1 coins carry over; Round 2 points start at zero. An eligible solve adds the full **250-1,000 coin bounty** to your wallet. Purchases spend coins.

Hints are bought in order. Additional costs: **10%, 30%, 80%** of bounty. All three cost **120% total**. Highest assistance gives **100% / 90% / 70% / 50%** of base points for no hint / Hint 1 / Hint 2 / Hint 3. Probe counts as Hint 1; Scanner as Hint 2. Use the highest tier; reductions do not stack.

An incorrect official submission adds **5 minutes to ranking time**, not a lockout. Samples and infrastructure errors have no such penalty. Ranking: **points**, then **cumulative solve time + penalties**, then **harder solved bugs**.

Black Market

Item	Coins	What it does
Boundary Probe	400	Extra practice example for one bug. Hint 1 assistance. Held item.
Hex Scanner	750	Highlights a broad buggy-code section, not the fix. Hint 2 assistance. Held item.
Overdrive Core	500	Glowing team name and upgraded visuals for the round. Cosmetic only.
Ghost Scan	1,500	Shows unclaimed bugs with no detected rival activity for 15 seconds. Two-minute cooldown; no guarantee nobody is working.
Chrono Shield	2,500	Protects the next admitted official submission by either teammate from the wrong-answer time penalty. One per team per round.
Claim Lock	5,000	Five minutes to earn one eligible bug even if another team claims it. Others can still solve. Held item; one per team per round.
Black ICE	15,000	Freezes a rival's new shop/hint purchases for 30 minutes. One outgoing attack; each target can be hit once per round.

Held items: buy in the shop, then use on the question page. No second charge. Claim Lock starts on activation; a correct submission received before expiry can qualify even if judged later. **Black ICE does not stop coding, submissions, earning, purchased hints or use of owned items.** Global technical pauses freeze shop timers; personal/team pauses do not.

Keep it fair. Ask for help early.

No AI, external websites or outside help. Phone use without organiser permission means instant disqualification. Keep your team code private.

Network/judge problem? Keep the tab open, tell staff and check the original request before retrying. Offline submission is unavailable. Use **Report question** for a faulty bug. **Reset code** replaces your draft; it does not refund purchases.

Submit before the official deadline. The round starts at **10:00 AM sharp**; only organisers can announce a pause or extension.
